Initial Meeting Notes - Yina Li and Emily Hu

Content
- [Philosophy of AI](#)
- notes about the arguments (there should be linked pages within each argument for more detailed information)

Design
- something clean and modern, theres not images so maybe focus on typography?
- doesn't have to be super techy, but would be nice to reflect the content somehow
- potentially green?
- navigation ideally on the left, but flexible on that
- engaging enough such that the average person (not a cs major) could feel invested in the subject
